### **Dissertation**

My dissertation (in progress, under the supervision of Georges Rey) focuses on questions of translatability between human languages. I analyze linguistic data, largely from understudied languages, to identify the extent to which meaning can be transferred between speech communities. This process helps to bring into focus questions about the process by which language expresses thought, and the limits of that process, as well as the nature of meaning itself.

### **Graduate Coursework:**

University of Maryland, College Park

Spring 2018

Plato's Political Philosophy (PHIL 828K)  
Modal Logic (PHIL 858)
